## Nuclei

### Experiment

- A Method to Measure Neutron Polarization Using  $P$ -Even Asymmetry of  $\gamma$ -Quantum Emission in the Neutron–Nuclear Interaction  
*Yu. M. Gledenov, V. V. Nesvizhevsky, P. V. Sedyshev, E. V. Shul'gina, and V. A. Vesna* 781
- Channel Coupling and Exchange of an Alpha-Particle Cluster in Deuteron Scattering on  ${}^6\text{Li}$  Nuclei  
*S. B. Sakuta, N. Burtebaev, S. V. Artemov, and R. Yarmukhamedov* 785
- 

### Theory

- Quadrupole Moments of Some Doubly-Even Molibden Nuclei and the Onset of Collectivity  
*N. Turkan, I. Ibis, and I. Maras* 798
- Influence of Monopole Pairing on the Energies of Single-Nucleon States in the Problem of Superconducting Pairing Correlations  
*V. A. Kuz'min and T. V. Tetereva* 805
- Multiparticle Azimuthal Correlations of Negative Pions in Nucleus–Nucleus Collisions  
*L. V. Chkhaidze, T. D. Djobava, L. L. Kharkhelauri, and E. N. Kladnitskaya* 811
- Three-Cluster Model of Radiative Capture Reactions in Seven-Nucleon Systems. Effects of Cluster Polarization  
*V. S. Vasilevsky, A. V. Nesterov, and T. P. Kovalenko* 818
- Description of Deuteron–Nucleus Scattering in Terms of a Microscopic Optical Potential Based on Skyrme Forces  
*V. I. Kuprikov, V. V. Pilipenko, and A. P. Soznik<sup>†</sup>* 832
- 

## Elementary Particles and Fields

### Theory

- On the Possible Common Nature of Double Extensive Air Showers and Aligned Events  
*V. I. Yakovlev* 845
- Impact Factor for Gluon Production in Multi-Regge Kinematics in the Next-to-Leading Order  
*M. G. Kozlov, A. V. Reznichenko, and V. S. Fadin* 850
- 

**6th International Workshop on Critical Point and Onset of Deconfinement,  
Dubna, Joint Institute for Nuclear Research,  
23–29 August, 2010\*  
Elementary Particles and Fields**

### Contributed Talks

#### Theory

- Determination of the Finite Temperature Equation of State of Dense Matter  
*A. Yu. Illarionov, S. Fantoni, F. Pederiva, S. Gandolfi, and K. E. Schmidt* 866
- AdS/QCD at Finite Density and Temperature  
*Y. Kim* 870
- 

\* Continuation of the publication. For the beginning of it, see *Phys. At. Nucl.* **75**, nos. 5, 6 (2012).

---

**Poster Talks**  
**Theory**

Finite Formation Time of Hadrons: the QGP Signatures <i>S. M. Eliseev</i>	879
Debye Mass and Heavy Quark Potential in a PNJL Quark Plasma <i>J. Jankowski and D. Blaschke</i>	882
The Simplest and Universal Constituents for Description of Leptons and Hadrons <i>O. S. Kosmachev</i>	885
On Possibility to Observe Chiral Phase Transition in Separate Fragments of Dense Baryon Matter <i>B. F. Kostenko and J. Pribiš</i>	888
On the Critical Behavior of $(2 + 1)$ -Dimensional QED <i>A. V. Kotikov</i>	890
Neutron Star Matter in a Modified PNJL Model <i>R. Łastowiecki, D. Blaschke, and J. Berdermann</i>	893
A Formula for Charmonium Suppression <i>C. Peña and D. Blaschke</i>	896
Renormdynamics, Negative Binomial Distribution, and Riemann Zeta Function <i>N. V. Makhaldiani</i>	899
Strongly Interacting Parton Matter Equilibration <i>V. Ozvenchuk, O. Linnyk, E. Bratkovskaya, M. Gorenstein, and W. Cassing</i>	903
Finite-Size Scaling as a Tool for the Search of the Critical Endpoint of QCD in Heavy-Ion Data <i>L. F. Palhares and E. S. Fraga</i>	906
Isolated Neutron Stars in the Galaxy: from Magnetars to Antimagnetars <i>P. A. Boldin and S. B. Popov</i>	908
Two- and Three-Color Two-Quark States in Warm, Dense Quark Matter <i>D. S. Zablocki, D. Blaschke, and M. Buballa</i>	910
